### **A new creation from the collaboration of the Pavillon Neuflyze OBC, / research lab of Palais de Tokyo and Fluxum Foundation/Flux Laboratory**

A new creation from the collaboration of the Pavillon Neuflyze OBC, research lab of Palais de Tokyo and Fluxum Foundation/Flux Laboratory

This year, the Pavillon Neuflyze OBC and Fluxum Foundation/Flux Laboratory travel to Athens concurrently with Documenta 14 to carry out a choreographic project under the direction of Andonis Foniadakis. In collaboration with 8 choreographers of the Greek scene, the artists in residence question the notion of community as a situation, and not as a subject to illustrate. The ambition is to invent, the time of an experience of collective creation, a fictitious "us" as a way of escaping assigned identities. This hybrid contemporary project will be presented in a historic building (located on Akadimias Street 23), inviting the public to walk around in a unique atmosphere encompassing the architectural dimension of the location.
